

TURAX BO 217

Core Points : Deliming agent based on organic and inorganic acids, free from chlorides, sulfates and nitrogen.

Product Description : Buffered organic acid and polycarboxylic acids blend

Specifications

Appearance	: White powder
Total Solid (%)	: min. 75
pH (1:10)	: 1,75 – 2,5

Applications

Turax BO 217 is a product with a gentle deliming power, efficient acid reserve, and it is completely free from chlorides sulphates and nitrogen. Thanks to its balanced components it has the capability to remove lime chemically bonded that remain into the pelts, meanwhile offering to the protein more presence of reactive groups with a consequent pre-masking action for tanning metal ions. **Turax BO 217** drastically reduces the development of toxic gas during deliming operation. It's suggested where there is to achieve excellent softness and cleaning of grain along with pronounced fullness and a remarkable fine and smooth grain pattern.

Recommended usage of **Turax BO 217** :

- Calves and Sheepskins : From 0,50 to 2,00 % in deliming on pelt weight

Packaging

: 25 Kg. Kraft Bags

Storage

: At least one year when stored properly according to international industrial norms and practice between 5° - 50°C original sealed packing.

After opening the package, product must be consumed in a short period of time and preserved inside its original packing until it is finished.

Safety Measures

: This product is dangerous if inhaled. Please revert to relevant Safety Data Sheet.
